

Use these images of each complete dino balloon to help you identify the dino parts on each of the SVG files.

Note that you will have 2 x front legs and 2 x back legs for most of the dinosaurs, and the triceratops has 2 x faces as well so that you can create a 3D effect by joining them at the horn in the front.

These templates are for your personal use only and cannot be redistributed, altered etc. in any way without permission from Flicker & Flock. Thanks + enjoy!
